中文文獻資源共建共享合作會議 —— 簡介

Introduction of the CCDSCR

「中文文獻資源共建共享合作會議」（Conference on Cooperative Development and Sharing of Chinese Resources (CCDSCR)，以下簡稱為「文獻會議」）是源起於 2000 年的國際合作會議，宗旨在於聯繫世界各地收藏中文文獻資源的圖書館或資訊機構，以促進中文文獻資源的共建共享。過去 24 年來，會議先後在北京、臺北、澳門、南京、香港、敦煌及蘭州等地舉行了共 14 次會議，參加者包括來自中國大陸、香港、澳門、臺灣、日本、新加坡、美國、英國、荷蘭等國家和地區的代表。自 2006 年起，「文獻會議」改為每兩年召開一次，會期 2 至 4 天，會議設有主題，討論中文文獻資源共建共享的相關問題，與會者除報告專案進展外，也洽談新的合作項目，促進分享與交流。

「文獻會議」設有理事會，負責管理及監督會議的進行、確定會議主題及承辦單位、審核專案立項、進展與結項、審議資金使用以及研究其它相關重大問題等。理事會成員由中國國家圖書館、中國科學院國家科學圖書館、北京大學圖書館、臺灣漢學研究中心、香港公共圖書館、澳門公共圖書館管理廳、澳門圖書館暨資訊管理協會以及哈佛大學哈佛燕京圖書館等機構的代表組成。理事會每年開會一次，2023 年第十六次理事會已於北京舉行。

自第一次會議至今，「文獻會議」已促成了 15 個合作項目，當中包括古籍目錄、拓片、家譜、文獻數碼化、名稱規範等多個領域。

The CCDSCR was first initiated as an international cooperative conference in 2000, with its objectives to connect all libraries or information institutions worldwide that hold Chinese documents and to enhance cooperation and resources sharing among these organisations. In the past 24 years, 14 conferences had been held in Beijing, Taipei, Macau, Nanjing, Hong Kong, Lanzhou and Dunhuang, with participants coming from Mainland China, Hong Kong, Macau, Taiwan, Japan, Singapore, USA, UK and the Netherlands, etc. Starting 2006, the conference was scheduled biennially, with each conference lasting for 2 to 4 days. For each conference, a main theme is set to facilitate the attendants to discuss on the mutual construction and sharing of Chinese resources. Other than topical reports on past projects, the attendants also talk on cooperation of new projects.

The Council of the CCDSCR is responsible for the supervision and management of the organisation of the conference, to assign the main theme and the organiser for each conference, to endorse the registration of new projects, to monitor the progress and concluding reports of established projects, to deliberate on the financial affairs and to discuss on major issues. The Council comprises representatives from the National Library of China (NLC), the National Science Library of the Chinese Academy of Science (CAS), the Peking University Library, the Centre for Chinese Studies of Taiwan (CCS), the Hong Kong Public Libraries (HKPL), the Department of Public Library Management of the Cultural Affairs Bureau of the Macao SAR Government, the Macau Library and Information Management Association (MLIMA) and the Harvard-Yenching Library. The council meeting is scheduled annually, while the 16th meeting had been held in Beijing in 2023.

Since the first conference, there had already been 15 cooperative projects established, including the catalogues of ancient books, rubbings, genealogy, digitisation of documents, Chinese name authority, etc.

大模型作為一種圖書館服務：為什麼和怎麼做

劉煒博士（上海圖書館副館長）

大模型正逐漸成為圖書館服務的重要組成部分，本報告通過對大模型最新進展和應用技術的分析，從四個方面探討其在圖書館應用的角色和潛力。首先，作為一種知識庫資源，大模型匯集了海量信息，能夠提供廣泛深入的問答和諮詢服務。其次，作為智力工具，大模型能夠幫助圖書館在館藏資源的分類、標註、內容識別與抽取，提取實體關係等方面提供幫助，成為圖書館的信息組織與管理的幫手甚至替代者。第三，大模型可以作為圖書館服務平台的重要組成部分，集成到下一代平台的各種功能模塊中，例如可以幫助進行資源管理和發現、幫助實現個性化推薦及多樣化的人性化服務等。最後，圖書館可以提供大模型的素養教育，起到資源驗證和提供可信服務的作用，幫助用戶理性使用人工智能。

Topic 5

LLM as a Library Service: Why and How

Dr. LIU Wei (Deputy Director, Shanghai Library)

LLM is gradually becoming an important component of library services. This report explores the roles and potential of LLM in library applications in four areas by analysing the latest developments and application technologies of LLM.

First, as a knowledge resource, LLM can provide extensive and in-depth inquiry services by aggregation of vast amounts of information. Second, as an intellectual tool, LLM can assist libraries in various tasks such as categorising, tagging, and extracting content from collection resources, etc. It serves as an aid or even a substitute for information organisation and management in libraries. Third, LLM can be an important element of library service platforms, integrated into various functional modules of next-generation platforms. For example, it can assist in resource management, support personalised recommendations and offer diverse humanised services. Finally, libraries can provide literacy education on LLM. It contributes to verifying resources and assists users in effectively and responsibly utilising artificial intelligence.

Every exhibition is different, and conservators increasingly must find a balance that without compromising the preservation needs of the items. The presentation will share on the challenges and learning points obtained from the conservation and preparation processes during the exhibition.

「特藏文獻修護資料庫」於特藏實體物件修護管理之運用

林俐伶女士（臺灣漢學研究中心特藏文獻組紙質修復師）

為有效利用數位化管理提升修護工作效益，本館特規劃建置「特藏文獻修護資料庫」，將文物狀況檢視資料電子化、系統化分門別類儲存，並整合修復歷程記錄、預防性維護記錄、文物實體所在地記錄管理等，以全面掌握特藏文獻保存狀態。

該資料庫整合書目簡目資訊，除可用以紀錄特藏文獻的裝幀形制、材料與媒材外，亦可利用專業詞彙逐一詳載劣化狀況並分級管理。此外，資料庫也可記錄修復方法與使用材料，並上傳修復前後比對照片。針對同一件文物，可建置多筆修護歷程，也可匯出完整修復報告與狀況檢視登錄報告，以配合修復工作程序進行文物實體狀態之即時管理。

這不僅大幅提升修護作業管控流程效益，也使文物狀態在系統上一覽無遺，同時也可讓多位管理者共同管理，使文物修護資訊與物件狀態，不再只是片面且分散地儲存，而能有效共同監管，使特藏管理者能隨時有效掌握文物的即時資訊。

Topic 13

Application of the Special Collections Conservation Database in the Management of Physical Object Conservation

Ms. LIN Li-ling (Paper Conservator, Centre for Chinese Studies, Taiwan)

To effectively apply digital management for enhancing the efficiency of conservation work, the library has specially planned and established the "Special Collections Conservation Database." This system digitises and systematically categorizes the condition assessment data of cultural artifacts, integrating records of restoration processes, preventive conservation records, and the physical location management of artifacts, to fully monitor the preservation status of special collections.

The database consolidates bibliographic and descriptive information, which not only allows for recording the mounting styles and materials of special collections but also enables detailed documentation of deterioration conditions with professional terminology and graded management. Additionally, it records restoration methods and materials used, and allows for uploading comparison photos from before and after restoration. For a single artifact, multiple conservation records can be established, and complete restoration reports and condition assessment registration reports can be exported, enabling real-time management of the physical condition of artifacts in line with conservation procedures.

This significantly improves the efficiency of managing conservation workflows, provides a clear overview of the condition of the artifacts within the system, and allows multiple administrators to collaboratively manage the information. Consequently, conservation data and the condition of the artifacts are no longer stored in a fragmented and isolated manner but can be effectively co-managed, allowing special collections managers to stay updated on the real-time status of the artifacts at any time.
