CIRCULARITY Concepts in the Pulp and Paper Industry.

**Geneva : Co-published by United Nations ;
FAO, c2024.**

**UN
338.47676102
86
CIR**

This report illustrates the circularity concepts in paper product industry with detailed descriptions on production process from raw material selection to multi-functional designs and the application of side stream to produce with higher value. It also overviews the changing focus of the industry from resource-intensive to energy use effectiveness and consumption reduction, based on prominence of high recycling rate.

GLOBAL Competition Law and Policy Approaches to Digital Markets.

Geneva : United Nations, c2024.

**UN
343.0721
GLO**

In recent years, there is a transformation of business model from physical markets to digital platforms in the global economy. This report analyzes the current legislation and law enforcement regarding competitions on digital platforms in case study basis. It also provides advice for policy makers for consideration and implementation of legal tools and approaches in monitoring digital platform competition issues and possible aids from international cooperation.

INTELLIGENT Transport Systems (ITS) for Sustainable Mobility : Part of the WP.29 "How It Works - How to Join It" Series (2nd ed.). Geneva : United Nations, c2023.

**UN
338.0285
INT**

UNECE foresees the global transport transformation and has established a comprehensive set of regulations to support the development of Intelligent Transport across diverse inland transport systems in 2012. With the revisions in 2021, this publication summarizes the achievements of Intelligent Transport Systems by strategic utilization of advanced technologies for global transportation improvement.

INTERNATIONAL Fisheries access Agreements : Challenges and Opportunities to Optimize Development Impacts. Geneva : United Nations, c2024.

**UN
639.2
INT**

International Fisheries Access Agreements (IFAAs) were developed for legal framework constructions among countries due to the rapid distant water fisheries in recent decades. This report examines the practices of IFAAs in discrete cases and studies the gaps, challenges and successful examples. It also serves as a guide for states to apply IFAAs for optimizing economic, environmental, geopolitical benefits in their fishery industries.
