DATA Stewardship and the Role of National Statistical Offices in the New Data Ecosystem. Geneva : United Nations, c2024.	UN 310.68 DAT
---	------------------------------

Data stewardship refers to the role as data service providers, usually taken by national statistical offices. This publication illustrates the concept of data stewardship within the rapidly changing structure of new data ecosystem and other foundation ideas associated with the context of official statistics. It also provides guidance for national statistical offices to make their data service plans and reference for the public data holders.

**GOOD Practices and Lessons Learned in Data-Sharing
in Transboundary Basins.
Geneva : United Nations, 2024.**

UN
333.91
GOO

Transboundary water resources across more than one country are significantly affected by their national social and environmental conditions and thus information and data sharing are essential among those countries to improve resource management. This publication introduces the legal framework suggested from Water Convention hosted by UNECE to extend the transboundary cooperation to widest scale with examples of successful implementation of water resource monitoring and assessment.

**POLICY Paper on Accelerating the Transition towards a
Circular Economy in the Economic Commission for
Europe Region : Improving the Traceability of
Products along International Value Chains.
Geneva : United Nations, c2024.**

UN
338.927094
POL

Effectiveness of a circular economy depends on the information about product and production for stakeholders to take approach and thus traceability and transparency of value chain are crucial factors. This paper examines the cases in the Economic Commission for Europe region on their agrifood, garment and footwear, minerals sectors and analyses their success and adversity in transition to circular economy. Recommendations to optimize traceability and transparency are also raised from these examples.

**REPORTING on Forest Damages and Disturbances in
the UNECE Region.
Geneva : Co-published by United Nations ; FAO,
c2024.**

UN
634.96094
REP

Number of forest damages and disturbances in the UNECE region has a notable increase in past decades and sharing sufficient and accurate relevant data are essential to maintain forests' vitality and sustainability. This publication analyses the existing international reporting system on forest damages and disturbances, and advises in detail to improve the assessment and reporting scheme in aspects of transparency, completeness, consistency.
