**UN
382.7
KEY**

According to difference in factors such as regions, types of products, political geography and trade nature, a wide range of policies and instruments can be applied respectively to regulate the international trade. This report focuses on the implementation on tariffs, trade agreements, non-tariff measures and trade defense measures and provides relevant statistics at various aspects.

**TRADE Preferences Outlook 2024.
Geneva : United Nations, c2024.**

**UN
382.7
TRA**

Non-reciprocal trade preferences (NRTPs) are used as a trade policy instrument to support the North-South trade relations and benefit developing countries with privileged trade environments in past decades. This report overviews NRTPs working progress and evaluates how they promote export diversification in developing countries. It also examines the changing effect of the preferences under current trend of trade dynamics and policy landscape, and suggests directions for improvement.
