GAN**
Can blockchain revolutionize international trade?
Geneva : World Trade Organization, c2018.

Analyses how Blockchain is related to international trade and the potential benefits it might bring. It offers insights into the extent to which Blockchain could affect cross-border trade in goods, services and intellectual property rights. It concludes with a review of various challenges that must be addressed before the technology can be used on a wide scale and have a significant impact on international trade.

**REDESIGNING the uranium resource
pathway : application of the United Nations
Framework Classification for Resources for
Planning and Implementing Sustainable
Uranium Projects.
Geneva : United Nations, c2019.**

**UN
621.48335
RED**

Shows how uranium resources could create a platform for innovative engagement with the integrated challenge of natural resource management and climate action. This report argues that uranium acts as a critical source of energy for meeting the global sustainability objectives on energy and climate action.

**REVISED guidelines on environmental impact
assessment in a transboundary context for
